

Antimicrobial resistance - From mechanisms to global implications

Wednesday, November 15, 2023, 08:30 – 18:00 CET | Geneva University Hospital

Program

8:30 – 9:20	Arrival/Check-in
9:20 – 9:30	Salvatore Fabbiano (<i>Trends in Endocrinology and Metabolism</i>) & Sheba Agarwal-Jans (<i>iScience</i>) Welcome remarks
Session 1	Emerging antimicrobial resistance (Chair: Sheba Agarwal-Jans)
9:30 – 10:00	Patrice Nordmann (University of Fribourg) Emergence of antibiotic resistance in gram negatives
10:00 – 10:30	Trish Simner (Johns Hopkins University) New antimicrobial agents – No problem?
10:30 – 11:00	Gaud Catho (Geneva University Hospital) Fighting antimicrobial resistance: Current insights in infection control and antimicrobial stewardship
11:00 – 11:15	Coffee break
Session 2	Metagenomics in AMR (Chair: Salvatore Fabbiano)
11:15 – 11:45	Etienne Ruppé (University of Paris) Antibiotic resistance detection in clinical metagenomics
11:45 – 12:15	Claire Bertelli (Centre Hospitalier Universitaire Vaudois) Metagenomics data mining for antimicrobial resistance prediction
12:15 – 12:45	Chloé Loiseau (Swiss Tropical and Public Health Institute) Ecology and evolution of multidrug-resistant <i>M. tuberculosis</i>
12:45 – 14:00	Lunch break
Session 3	Clinical AMR (Chair: Sheba Agarwal-Jans)
14:00 – 14:30	Lisandra Aguilar Bultet (University Hospital Basel) Within-host genetic diversity of extended-spectrum beta-lactamase-producing enterobacteriales
14:30 – 15:00	Tristan Ferry (Hospices Civils de Lyon) Phage therapy to fight severe infections in the era of antimicrobial resistance
15:00 – 15:30	Rino Rappuoli (Fondazione Biotecnopolis) Human monoclonals and vaccines to combat AMR
15:30 – 16:00	Christoph Dehio (NCCR AntiResist) Revitalizing antibiotic discovery through in-vitro modeling of in-patient infection conditions
16:00 – 16:15	Coffee break
Session 4	Epidemiology and surveillance (Chair: Salvatore Fabbiano)
16:15 – 16:45	Stephan Harbarth (Geneva University Hospital) AMR as a global problem: Clinical and public health implications
16:45 – 17:15	Stephen Baker (Wellcome Sanger Institute) Where do we go next with AMR?
17:15 – 18:00	Keynote talk: Haileyesus Getahun (WHO) From metagenome to policy and practice: How to bridge the gap for AMR?
18:00 – 18:15	Jacques Schrenzel (University of Geneva) & Salvatore Fabbiano (<i>Trends in Endocrinology and Metabolism</i>) Closing remarks
